

# Modern HireMe Button

## Overview

The Modern HireMe Button is a sleek and eye-catching component designed to be easily integrated into personal portfolios, resumes, or websites. This project aims to provide a contemporary and engaging way for users to express interest in hiring you or contacting you for opportunities.

## Description

The HireMe Button features a modern design with smooth hover effects, making it stand out on your webpage. It is created using HTML and CSS to ensure simplicity and ease of integration. The button includes subtle animations to capture attention and encourage interaction, making it a stylish addition to your personal brand.

## Preview

## Technologies Used

- **HTML:** The button structure is built using HTML to provide a semantic and accessible foundation.

- **CSS:** Styling and animations are implemented using CSS to create a visually appealing and interactive design.

## Features

- Modern and clean design to enhance your personal brand.
- Smooth hover effects for an engaging user experience.
- Lightweight and easily customizable for seamless integration.
- Encourages user interaction with a call-to-action design.

## How to Use

1. Clone the repository:

```
https://github.com/abhinay-kumar47/Hireme_button.git
```

2. Copy the HTML and CSS code from the repository into your project.
3. Customize the button text and colors to match your personal branding.
4. Integrate the button into your portfolio or website.

## Contribution

Contributions are welcome! If you have ideas for improvement or encounter any issues, feel free to open an issue or submit a pull request.
